

THE MYCROFT HEIMDALL PORTAL

The Mycroft Heimdall Portal is a patent-pending secure management interface that provides role-based access control specifically for delivering secure virtualized applications in private cloud environments. Leveraging a self-service model, the new portal allows enterprises to request, manage and view its data centers, grids and applications based on service levels and individual user roles.

Unique to the industry, the Mycroft Heimdall Portal provides Service Measurement Index* (SMI) compliance, an emerging industry standard to help organizations assess cloud services based on specific business and technology requirements.

The innovative portal features an application deployment rapid response capability that converts business requests into technical queries for optimal interactions between IT and corporate groups.

ENHANCED EFFICIENCY

- Provides single access point to multiple grids for quick application selection & delivery
- Delivers accurate management, tracking & monitoring on single or multiple grids
- Available as a stand-alone product or pre-loaded with the Mycroft Private Cloud Appliance

INCREASED AGILITY

- Features rapid response capability that converts business requests into technical queries
- Leverages transparent subscription billing model with usage views from single applications up to organizational levels
- Ensures accurate delivery of the right environment & workload

IMPROVED SECURITY

- Delivers single & organizational grid views and/or data centers based on user access levels
- Provides user friendly interface to a secure, elastic environment

RISK REDUCTION

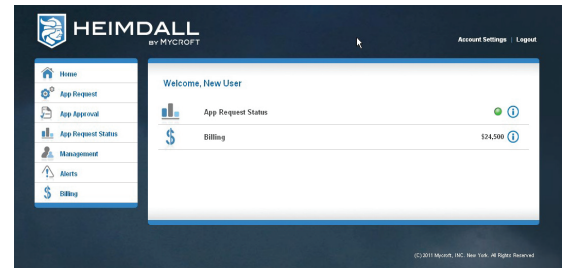

- Features Service Measurement Index* (SMI) compliance for standards-based measurement & comparison across internal & public cloud services
- Delivers SMI-determined critical events notifications via email or text message based on key performance indicators

* The Service Measurement Index (SMI) is rapidly emerging as the industry's de facto standards-based measurement index based on key performance indicators such as risk management, cost containment & security enhancements for measuring and comparing internal and public cloud services.

AT A GLANCE

- Provides single access point to multiple grids for quick application selection & delivery
- Leverages self-service model for accurate management & monitoring
- Features Service Measurement Index* compliance to help assess cloud services
- Includes rapid response capability that converts business requests into technical queries

ABOUT MYCROFT INC.

Mycroft Inc. is the innovation leader in IT security, identity, access management and regulatory compliance solutions. Focused on the configuration, delivery and management of its solutions, the company seamlessly integrates its software and professional services expertise to deliver enterprise implementations and private cloud-based managed services.

Mycroft Inc.'s cloud-based security offerings further draw on the company's heritage of innovation, providing the industry's first controls-compliant, scalable cloud-based platform.

Mycroft Inc. is headquartered in New York City and St. Louis and has service centers in The UK, Ireland and India. For more information, visit www.mycroftinc.com or call 212-983-2656 x1.
